SUMMARY

Full-stack Developer, graduate of Da Nang University of Science and Technology, with 2+ years of experience developing and building Web/App systems (ERP, CRM, CHR, E-commerce). Proficient in PHP and JavaScript with the Laravel, React and Spring Boot frameworks, and solid knowledge of MySQL. Experienced in designing REST APIs, webhooks, connectors, esb2 events and MCP, and in working with content management systems (CMS) such as WordPress and Drupal.

WORK EXPERIENCE

Full-stack Developer

03/2024 – 10/2026

Lundi Matin Groupe (France) · Remote from Da Nang

- Built and developed features for ERP, CRM and e-commerce systems.
- Technologies: PHP, JavaScript, AngularJS, Vue.js, MySQL, Twig, HTML/CSS;
- Worked with the Laravel, Yii2, Symfony, WordPress and Drupal frameworks.
- Designed, built and integrated RESTful APIs, Cron Jobs, Esb2 Events, Connectors, AI Integration, MCP and Webhooks to connect the system with external services.
- Integrated with multiple platforms/partners: Shopify, Magento, Viva Payment, Riashop, Yuto, SaaS EBP, Wimoov, Station-one, Axialease, Cogasa, Uppler, Izberg.
- Worked with GitHub, GitLab and CI/CD in a Scrum Agile process; took part in code reviews and QA before each release; held weekly reports and discussions.

EDUCATION

Da Nang University of Science and Technology – The University of Danang

09/2020 – 09/2025

Engineer in Information Technology

Graduated with Honors (Very Good) | **GPA:** 8.39/10. Relevant foundational coursework:

- Databases, Advanced Databases, Data Structures and Data Mining.
- Software Architecture, Distributed Systems Architecture and Development.
- Service-Oriented Architecture, Information Systems and ERP.
- Software Quality Assurance, Software Testing, Software Project Management.
- Operating Systems, System Programming, Computer Networks, Network Security, Information Security.

PROJECTS

FoodMart – AI-integrated E-commerce Platform — Full-stack Developer [Live Demo] [GitHub] 2023

- Built a React 18 SPA covering the entire shopping flow: catalog, cart, checkout & payment, wishlist, reviews/comments.
- Integrated Gemini 1.5 Flash (Vision): users upload a photo of ingredients or a dish and the AI recognizes it and suggests recipes with ingredient lists.
- Implemented Admin/Seller/Customer role-based access with Protected Routes; automatic order confirmation emails (EmailJS); wrote unit tests with Jest & React Testing Library.

`React 18` `Gemini AI` `React Router v6` `Axios` `Ant Design`

Ashion Vendor – E-commerce Seller Management Platform — Full-stack Developer [Live Demo] [GitHub] 2023

- Developed an admin interface for managing products, orders, customers, inventory and finances.
- Implemented role-based access control (RBAC) per feature and protected pages (ProtectedRoute).
- Integrated AI: image-based search (Visual Search) and automatic product image generation.
- Built a financial dashboard with Chart.js; Excel/PDF report export and instant invoice printing.

`React 18` `Vite` `Chart.js` `jsPDF` `EmailJS`

MysticTarot AI – Interactive Tarot Reading & AI Consultation App — Full-stack Developer [Live Demo] [GitHub] 2024

- Built an interactive Tarot web app with the full 78-card deck (upright/reversed) and multiple spreads (1-card, 3-card, Celtic Cross...).
- Integrated Gemini AI to interpret readings in several tones (Empathetic, Direct, Mystical) with follow-up chat with an AI Reader.
- Added a Tarot encyclopedia and saved reading history with Local Storage.

`Next.js` `React 19` `TypeScript` `Gemini API`

Network Quest – Gamified Networking Study Platform — Full-stack Developer [Live Demo] [GitHub] 2024

- Web app for reviewing computer networking (CCNA, Firewall/Packet filtering) through timed quizzes with a progress bar and answer explanations.
- Built a firewall rule mini-game (Firewall Simulation).
- Managed state and practice history with Zustand (LocalStorage); visualized scores with Recharts; wrote unit tests with Vitest.

`Recharts` `Next.js 16` `React 19` `TypeScript`

SKILLS

Programming Languages:	C/C++ · C# · Java · PHP · Python · JavaScript · TypeScript
Front-end:	ReactJS · Next.js · Vue.js · AngularJS · jQuery · HTML5/CSS3 · Tailwind CSS · Bootstrap · Twig · Ant Design
Back-end:	Laravel · Symfony · Yii2 · Spring Boot · WordPress · Drupal · Django · Node.js · .NET / ASP.NET Core
Databases:	MySQL · MariaDB · MongoDB
System Integration:	REST API · Webhook · Cron · ESB2 · Connector · MCP
Tools:	GitHub · GitLab · Docker · DDEV
Methodology:	Agile/Scrum · CI/CD · Code Review
AI Agents:	Claude Code · Codex · Antigravity

CERTIFICATIONS

TOEIC – English Proficiency Certificate 01/2025 - 01/2027
IIG Vietnam — TOEIC (Test of English for International Communication) · Score: 510/990

DELF B1 – French Language Certificate 10/2022
France Éducation international (French Ministry of Education) — B1 level of the Common European Framework of Reference (CEFR)

LANGUAGES

English	Advanced (TOEIC 510/990)
French	Basic (DELF B1)
