SUMMARY

Web developer with 2+ years of hands-on experience building and shipping customer-facing e-commerce interfaces, currently working full-time on a live retail platform at Lundi Matin Groupe (France). I combine solid frontend skills (HTML5, CSS3, JavaScript, jQuery, ReactJS) with a product-first mindset — thinking from the end user's perspective to remove friction, simplify flows, and write copy that drives action. Comfortable customizing CMS-driven pages beyond what default builders offer, and experienced working iteratively with real content on production websites. I care about clean interfaces, reliable code, and building things that actually get used.

EXPERIENCE

Full-stack Developer

2024 – Present

Lundi Matin Groupe · France (Remote)

- Work on the customer-facing e-commerce platform used by online and brick-and-mortar retail clients across France; directly responsible for improvements to shopping UI and user flows.
- Collaborate with Product Owners in a French-language environment to translate store-operations and UX requirements into polished front-end implementations.
- Contribute custom HTML/CSS/JS overrides to extend the platform's default builder capabilities — nav bar behaviour, cart flow, service block layouts, and filtering components.
- Participate in structured code review and QA before each release, maintaining a stable and visually consistent user experience.
- Integrated LiteLLM/AI API features and debugged production PHP/JavaScript issues in a legacy Prototype.js codebase.

`Drupal` `Twig` `WordPress` `PHP` `Laravel` `Symfony` `Yii` `JavaScript` `jQuery` `Vue.js` `AngularJS` `HTML` `Tailwind CSS` `Bootstrap` `MySQL` `Figma` `REST API` `ERP` `CRM`

Web Front-End Developer Intern

May – Jul 2023

Tekup JSC · Da Nang, Vietnam

- Built responsive customer-facing websites using HTML, CSS, JavaScript, jQuery, Tailwind CSS, and Bootstrap.
- Led a small team end-to-end from planning through delivery, coordinating tasks and visual direction.
- Adapted quickly to new frontend tools and frameworks under real production deadlines.

EDUCATION

Da Nang University of Science & Technology (DUT)

09/2020 - 09/2025

Information Technology Engineer — PFIEV (Programme de Formation d'Ingénieurs d'Excellence au Vietnam)

Degree Classification: Distinction (Giỏi) · **GPA:** 8.39 / 10 · 303 credits (10 semesters)

Core CS & Software Engineering Curriculum:

- Operating Systems, Computer Architecture, System & Linux Programming
- Network Security, Information Security & Cryptography
- Software Architecture, Distributed Systems & Service-Oriented Architecture (SOA)
- Computer Networks, Advanced & Mobile Networking, Network Design & QoS
- Databases, Advanced DB, Data Structures & Data Mining
- Software Quality Assurance, Testing & Software Project Management, ERP

PROJECTS

AI Facial Aging & Skincare Recommendation — Co-developer & UI Designer — Jun 2025

An AI-powered system that analyzes facial aging severity from user photos using CNN deep learning, then recommends personalized skincare products.

`Python` `CNN / Deep Learning` `React` `Image Processing` `UI/UX`

Fashion Store Management System — Full-stack Developer — Nov 2024

A modern admin dashboard for managing products, orders, and customer data at a fashion boutique — built with ReactJS + Vite frontend and Django REST API backend.

`ReactJS` `Vite` `Django REST` `MySQL` `Tailwind CSS` `JWT`

Bonne Santé — Developer (team of 4) — Jan – May 2024

A mobile-first health app that measures vital signs (heart rate, SpO2, blood pressure) via facial video using rPPG technology, with integrated telemedicine features.

`React Native` `rPPG / AI` `Healthcare UX` `REST API` `Scrum`

E-Shopper — Full-stack Developer — May – Nov 2023

A full-featured online shopping platform with seller channel, blog/content section, admin dashboard, and complete purchase journey from browse to order confirmation.

`PHP` `Laravel` `ReactJS` `MySQL` `jQuery` `CKEditor` `Netlify`

Food Mart Grocery Store — Full-stack Developer — Sep – Nov 2023

A full-stack grocery e-commerce platform with QR-code payment integration (PayOS), seller management tools, and live deployment.

`Java` `Spring Boot` `ReactJS` `Vite` `MySQL` `PayOS` `Render`

AWARDS

2nd Prize — Innovative Technology Entrepreneurship Competition (The University of Da Nang) — Oct 2024

3rd Prize, Technology Award — BKDN Techshow — Technology Exhibition 2023-2024 (Da Nang University of Science and Technology) — Jan 2024

2nd Prize & Special Recognition Award — Smart Campus 2023 (Danang International Institute of Technology) — Dec 2023

2nd Prize — Startup Innovation Ideas — Light Up Your Creativity 2023 (Da Nang Youth Union) — Dec 2023

2nd Prize — Scientific Research Student Conference — FAST Tech Show 2023 (Da Nang University of Science and Technology) — Nov 2023

1st Prize 🏆 — DUT Hackathon — FASTER Team (KMS Technology) — Feb 2023

SKILLS

UI / UX & Design:	Component-based UI · Figma · UX Design · User Flows
Frontend:	ReactJS · Next.js · Vue.js · AngularJS · TypeScript · Vite · HTML5 · CSS3 · JavaScript · jQuery · Tailwind CSS · Bootstrap · Twig
CMS & Site Builders:	Drupal · WordPress
Backend:	PHP (Laravel, Symfony, Yii) · Java (Spring Boot) · Python (Django / DRF) · NodeJS (ExpressJS) · .NET (ASP.NET) · RESTful APIs · Web Services API · JWT Auth
Database & Tools:	MySQL · MariaDB · MongoDB · Git / GitHub / GitLab · Docker · Trello · Jira
Workflow:	Agile · Scrum · Code Review · CI/CD
DevOps:	Linux
